compliance

The types and degrees of regulations your facility is affected by often depends on the nature of your operations and your location. **iSi**'s compliance team assists companies in determining which regulations are applicable and where deficiencies lie. From there, our team will help you manage those liabilities by establishing user-friendly systems. Our professionals not only

environmental compliance

- Compliance Audits
- Permit Writing
- Hazardous Waste (RCRA)
- Clean Air Act
- Spill Control (SPCC) Plans
- SARA Title III
- Stormwater Pollution Prevention Plans (SWP₃)
- Wastewater (NPDES)
- DOT Hazardous Materials
- Training
- Temporary and Part-Time Staffing

safety compliance

- Compliance Audits
- Corporate Safety Programs and Policies
- Written Health and Safety Plans
- Training
- OSHA Inspection Representation
- PPE Evaluations and Hazard Assessments
- Temporary and Part-Time Staffing

industrial hygiene

- Indoor Air Quality Investigations
- Hexavalent Chromium Sampling and Compliance Services
- Mold Testing and Evaluation
- Employee Exposure Sampling
- Qualitative and Quantitative Surveys
- Noise Surveys
- Biological Evaluations
- Radiological Evaluations
- Lead and Asbestos Sampling
- Qualitative and Quantitative Respirator Fit Testing
- Temporary and Part-Time Staffing

know and understand the regulations, but they have made a career of finding practical, real-world solutions to environmental, safety and occupational health issues.

Our compliance team is comprised of experts with numerous years of experience in their respective fields. Most were environmental or safety managers of large companies and manufacturing facilities before they came to **iSi**. Some have also had work experience at regulatory agencies. This gives our team the unique ability to see situations from the business perspective, as well as the regulators'.

For compliance team example projects and resumes, please email our team at compliance@iSiEnvironmental.com.

a one-of-a-kind service: the EHS COOP

For a number of years, **iSi** has had a successful program called the EHS COOP. The EHS COOP is customized to small and medium-sized companies who have limited environmental, health and safety resources. The COOP gives these companies the opportunity to access an entire organization of professionals on a regular basis, all for the same price.

By providing an **iSi** person at your facility each week, whether it be half a day, a full day, or multiple days, the COOP allows companies to complete both critical and routine tasks, specialized projects requiring outside assistance and tasks that occasionally need a specialist. You decide what needs to be done and we give you the best person to do it. If we need to substitute a different specialist for a couple of weeks or more, no problem, it's covered in the program.
